

## Using Geo-Referenced PDFs with Avenza on iOS Devices

- 1) On your device, in the Avenza app, tap on the “Plus” icon in map view.

2. Tap on “From QR Code”

3. On your computer, navigate to the Trail Maps page on [www.skilarchhills.ca](http://www.skilarchhills.ca).
4. Hit “Click for QR Code” next to the map you wish to download.

### **Winter Use – Geo-referenced PDFs**

The following maps are geo-referenced and designed for use on cell phones and tablets. Software such as Avenza can locate you directly on the map.

With an iPhone or iPad, you can download the maps into Avenza by following the instructions here. For Android devices, please click here.

For a quick tutorial on using Avenza with Dropbox, please click [here](#). The full manual for Avenza is located [here](#). Do note that with an iPhone you must have an Internet connection when first importing a map while with an Android device you can load files from the device's storage.
